Cumberland
Nursing & Rehabilitation Center

Welcome

Making the decision to place a family member in a nursing and rehabilitation center is one of life's most difficult and emotional challenges. It's often a decision that occurs when the physical, emotional and economic burdens of home health care are at their peak.

When it becomes apparent that placement is the best answer for all concerned, Cumberland Nursing & Rehabilitation Center offers a comforting solution... professional 24-hour care that combines a standard of medical excellence with a traditional sense of caring.

Feeling Right at Home

At Cumberland the pleasures of everyday life are not lost to routine. We want residents to bring personal mementos and special possessions to make their rooms more like home.

Our pleasant decor, friendly atmosphere and clean environment are designed to encourage social interaction and a real sense of community.

Because we recognize that each individual is unique, a variety of activities are offered: outings, recreations, crafts and religious services are just a few. There is ample time for making friends, reading and visiting family members. Family members are considered an integral part in caring for our residents. You are always welcome to attend social gatherings, celebrate special occasions and visit with the staff.

Therapy Advantages

- **Physical Therapy:** The goal is to move the patient toward greater independence and mobility; either unassisted or with assist devices. The licensed physical therapist focuses on improvement, coordination, balance, strength, and endurance.
- **Occupational Therapy:** The goal is to assess personal self-care and daily living skills and to provide modified techniques and/or adaptive devices, as necessary, to assist patients in adapting their needs to the skills needed in activities of daily living.
- **Speech Therapy:** The goal is to assess and provide treatment for individuals with disorders of speech, language, swallowing, communications and / or feeding programs to help the patient recover lost skills or develop new ones.
- **Restorative Nursing:** The goal is for nursing to continue therapy following rehabilitation. The restorative nurse focuses on maintaining the status of the resident after discharge from rehabilitation and to restore as much functional independence as possible.
